EDUCATION

Master of Science, Financial Technology (Fintech) **8/2025 - 12/2026**
University of Central Florida

Bachelor of Science, Computer Science **8/2018 - 7/2022**
University of Central Florida, University of Southern California

PROFESSIONAL EXPERIENCE

Saia Inc. | **Software Engineer** **Atlanta, GA ● 7/2025 - 11/2025**
- Built logistics software for freight operations (LTL, FTL, multimodal) using React, Next.js, JavaScript, TypeScript, SQL, and Azure.
- Designed and built LLM-powered agents (function calling, tool use) with dispatch and compliance teams to automate internal quoting and driver compliance monitoring, integrating with internal APIs to track hours-of-service, break compliance, and driving activity in real time.
- Evaluated and interviewed engineering candidates to support team growth and maintain high technical standards.

NCR Voyix (Former NCR Corporation) | **Software Engineer** **Atlanta, GA ● 7/2022 - 7/2024**
- Shipped end-to-end features for NCR's Food and Mass Merchandise platform, including onboarding, loyalty, and third-party vendor integrations, supporting thousands of businesses globally with millions of daily transactions.
- Developed and tested grocery and mobile POS payment solutions with React.js, Redux, JavaScript, TypeScript, JSX, Node.js, SASS, Webpack, NPM, Yarn, Git, and PostgreSQL.

Center for Distributed Learning | **Software Engineer** **Orlando, FL ● 1/2020 - 8/2022**
- Developed learning management systems and PoCs using Node.js, React.js, Redux, Docker, SASS, Webpack, and PostgreSQL, achieving 90%+ test coverage with Jest and Enzyme.
- Led a team to design and build engagement analytics dashboards used by professors and internal teams to track usage and outcomes during the pandemic's shift to remote learning, while architecting reusable component libraries, design systems, shared UI kits, internal APIs, and CI/CD pipelines that powered it and future products.

Expand Financial | **Software Engineer and Co-Founder** **Atlanta, GA ● 8/2019 - 8/2026**
- Leveraged natural language processing and machine learning to develop tools that enhance financial literacy in personal finance and investments using React, Next.js, React Native, Node.js, Flask, Plaid, JavaScript, TypeScript, Redux, Firebase, OpenAI, among others.
- Built RAG-based and function-calling AI agents that answer personalized financial questions and autonomously pull live account and transaction data via Plaid, enabling real-time personalized financial guidance.

LEADERSHIP

Hacking for Defense (Department of Defense & U.S. Space Force) | **Software Engineer** **1/2022 - 8/2022**
- Developed a monitoring system to detect insider threats for the military and corporations by using unsupervised anomaly detection, artificial intelligence, natural language processing, graphing databases, clustering algorithms, React.js, Node.js, TypeScript, JavaScript, Flask, and Python, boosting insider threat detection by 87%.
- Worked directly with 300+ stakeholders across military branches and corporations to extract insider-threat detection workflows, translating fuzzy, high-stakes human processes into a working anomaly-detection system.

xLux | **Software Engineer and Founder** **9/2021 - 8/2022**
- Received $100,000 grant from the XRPL Foundation to build xLux, a credibility-based NFT platform, on the XRP Ledger.

CloudPlate (with 1517 Venture Capital Firm) | **Founder and Software Engineer** **9/2020 - 1/2021**
- Leveraged machine learning and OCR to increase engagement with dealership customers, speeding up services by 90% and processing 100s of clients/day/dealership using Python, JavaScript, React, Java, Node.js, MongoDB, HTML, CSS, and PostgreSQL.

Programming Competitions, Hackathons, and Awards | **Software Engineer** **8/2017 - 1/2022**
- Won 30+ hackathons and competitions, building award-winning full-stack products for companies like Google, Capital One, AutoNation, and Ford, using React.js, React Native, Vue.js, Node.js, Java, JavaScript, Python, AWS, Google Cloud, Firebase, SQL, HTML/CSS, JSON/XML, NPM/Yarn, NumPy, and Pandas.
